

Advanced Triggers

Q1. AFTER INSERT (Team Consistency)

Create an AFTER INSERT trigger on the player table that ensures the captain_id (if not NULL) belongs to the same team as the player; otherwise, reject the insertion.

Q2. AFTER UPDATE (Captain Integrity)

Create an AFTER UPDATE trigger on the player table that prevents updating a player's tid if they are assigned as captain of other players.

Q3. INSTEAD OF DELETE (Captain Reassignment)

Create an INSTEAD OF DELETE trigger on the player table that, before deletion, reassigns all players who have this player as captain to NULL.

Q4. AFTER INSERT (Match Validation)

Create an AFTER INSERT trigger on the match table that ensures team1_id and team2_id are not the same; otherwise, roll back the insertion.

Q5. AFTER UPDATE (Winner Validation)

Create an AFTER UPDATE trigger on the match table that ensures the winner_id is either team1_id or team2_id.

Q6. AFTER INSERT (Performance Constraint)

Create an AFTER INSERT trigger on the performance table that ensures a player can only have performance records for matches in which their team participated.

Q7. AFTER UPDATE (Aggregate Enforcement)

Create an AFTER UPDATE trigger on the performance table that ensures runs and wickets are not both zero for any record.

Q8. AFTER DELETE (Tournament Integrity)

Create an AFTER DELETE trigger on the tournament table that prevents deletion if matches exist for that tournament.

Q9. AFTER INSERT (Multi-table Consistency)

Create an AFTER INSERT trigger on the match table that ensures both teams have at least 11 players; otherwise, reject the insertion.

Q10. AFTER UPDATE (Salary Constraint with Team Average)

Create an AFTER UPDATE trigger on the player table that prevents a player's salary from exceeding twice the average salary of their team.
